What do mermaids keep in their purses?
Beth mae môr-forwyn yn ei gadw yn ei phwrs?

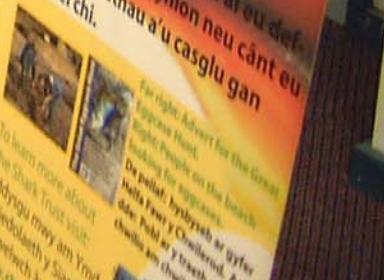

Lots of things! Lipstick, chocolate and baby sharks of course!
Llawer o bethau! Minifig, siocled a siarcod bach wrth gwers!
Yn ddiolch chi
Mae siarcod yn rhoi siarcod bach i'w hysgu ond dim siarcod bach yn rhoi siarcod bach i'w hysgu.

Join the Great Egg Hunt Ymunwch â Ffwr y Chwilerod

Each eggcase contains a baby embryo, that feeds off a yolk. Mae pob chwiler yn cynnwys siarcod bach neu embryo sy'n bwydo o'r ar gwd melynwy.
Over several months the eggcase becomes worn and weak, eventually allowing the miniature shark to break free. Dros nifer o fisoedd mae'r chwiler yn treulio ac yn mynd yn wan, gan ganiatáu i'r siarcod bach dorri'n rhydd.
Newly hatched sharks immediately feed and fend for themselves. Mae siarcod newydd ddeori yn bwydo ac yn edrych ar eu holau eu hunain ar unwaith.
Empty eggcases are either used by mermaids, or washed up onto beaches and collected by people like you! Caiff chwilerod gwag naill ai eu defnyddio gan fornyion neu cânt eu gochi i'r traethau a'u casglu gan bobl fel chi.
